

## HUMIDITY — HGM SERIES (Wet and dry bulb hygrometers)

Consisting of dry and wet alcohol filled glass thermometers fixed on a panel. By differential indication between these thermometers, humidity can be read from the table provided.

- Range: -20+50 Deg. C&F, -10+50 Deg. C&F
- Size: Approx. 288mm x 80mm, 300mm x 75mm

CZ1050

JC5000

## HUMIDITY — HGM SERIES (Instrument / 'Stevenson' screen)

The main purpose of this screen is to protect the thermometers / hygrometers against radiation / precipitation and ensure optimum measurement of air temperature, relative humidity, etc.

- Material: Kiln dried wood
- Dimension: Approx. 330 x 210 x 130mm
