

HUMIDITY — HGM SERIES (Whirling hygrometers)

ZEAL P2501

WD-2

Two thermometers are placed in flowing air. One thermometer bulb being covered by a wet wick. Evaporation from the wetted bulb causes its temperature to be depressed relative to that of the dry bulb. A handle enables the instruments to be whirled. The % RH can be read off the slide rule calculator integrated into the psychrometer.

- Range: -5 + 50 Deg. C&F (ZEAL P2501), 0-45 Deg. C&F (WD-2)

HUMIDITY — HGM SERIES (Dial thermo-hygrometers)

2300

TH600

Wall mounted bi-metal thermometer with hygrometer. Ideal for cabin use.

- Dial size: 130mm
- Range: -20+50 Deg. C, -10+50 Deg. C
- Humidity: 10-100 %, 0-100 %
- Material: Chrome brass, steel
